

The 2021 Zespri Group Limited Pool Hail Insurance Policy pays for the loss of individual Class 1 kiwifruit which is damaged by having been directly struck by hail, on the vine, and is unable to then meet export standards as a result of that damage.

THE INSURER

Allianz Australia Insurance Limited

THE COMPANY

Zespri Group Limited

POLICY PERIOD

1 August 2020 to 31 July 2021

COVER

The policy provides cover for kiwifruit damaged as a direct result of hail strike for the current season. The policy pays for the loss of individual Zespri Class 1 kiwifruit which is damaged by having been directly struck by hail, on the vine, and is unable to then meet Zespri export standards because of that damage. It does not cover consequential damage such as water stain or softening.

LIMIT VALUE

- Zespri Green (including Organic) is \$6 million, consisting of \$3 million pool-funded cover and \$3 million commercially-purchased cover.
- Zespri SunGold (including Organic) is \$7 million, consisting of \$4 million pool-funded cover and \$3 million commercially-purchased cover.
- Zespri Green 14 (including Organic) is \$270 thousand, consisting of \$20 thousand pool-funded cover and \$250 thousand commercially-purchased cover.

The commercial cover for each variety is activated only if the pool-funded cover is exceeded in the 2021 harvest season.

DEDUCTIBLE

The base deductible is 10% of the potential yield of each variety for any first claim. Deductibles will further increase in increments of 5% for claims in consecutive seasons.

IMPORTANT NOTE

The Pool Hail Insurance Cover provides partial compensation for yield loss due to hail strike. This policy does not provide full indemnity from hail losses and those growers who seek full indemnity or additional cover should consider purchasing additional private hail insurance or discuss with their grower entities hail insurance schemes available for entities through commercial insurers.

IF A HAIL EVENT AFFECTS YOUR ORCHARD

Within 72 hours of a hail event you should notify the Zespri Grower Contact Centre on 0800 155 355 and provide the following:

- Your name and KPIN.
- Physical location of your orchard.
- The date and time the event occurred.
- Are you the owner or lessee of the orchard?
- Estimate of percentage of fruit damaged.
- Any additional information that may be helpful to the loss assessor e.g. hail stone size, leaf cover damage.

Then:

- Zespri will log a hail event under your KPIN.
- Zespri will send the above details to an external loss assessor.
- The external loss assessor will contact you to arrange a suitable time to come and carry out a preliminary estimate of hail damage on your orchard.

BEWARE

If you proceed with harvest before assessment you will only be compensated for hail damage found during grading and packing within policy timeframes. If you choose to select pick you must have an on-orchard assessment before harvest for unharvested fruit to be included in the claim.

It is important you do not do anything to mitigate the damage before discussion with the loss assessor as the assessor may need to sight the damage as part of his assessment.

CONSTRUCTIVE TOTAL LOSS (CTL)

The level of assessed damage due to hail strike under the terms of the policy at which the crop is considered a write-off. An external loss assessor will be appointed and will declare (or not) a CTL, according to the following CTL limits:

Green (including Organic and excluding Green 14)

- Hail events on or before 31 December 2020 - 70% damage.
- Hail events on or after 01 January 2021 but before 01 March 2021 - 60% damage.
- Hail events on or after 01 March 2021 - 40% damage.

SunGold (including Organic)

- Hail events on or before 31 December 2020 - 70% damage.
- Hail events on or after 01 January 2021 but before 14 February 2021 - 60% damage.
- Hail events on or after 14 February 2021 - 40% damage.

Green 14

- Hail events on or before 31 December 2020 - 70% damage.
- Hail events on or after 01 January 2021 but before 01 February 2021 - 60% damage.
- Hail events on or after 01 February 2021 - 40% damage.

A CTL can only be declared where these limits are breached. For an orchard that has been partially harvested at the time of the hail event, the CTL limit will be applicable to the yield that remains unharvested immediately before the hail event.

COVERED CANOPY HECTARE REBATE

Orchards that have blocks with solid cover or hail netting will be eligible for a rebate. The rebate will be based on 80% of the total cost of the hail scheme for the season for the covered blocks production. To be eligible for this rebate, growers with covered canopies must:

- Have covered canopy erect by 01 October 2020.
- Have a minimum of 0.20 hectares covered or an entire variety on orchard covered.
- Have volume submitted into Zespri inventory that is from the area covered with hail netting or solid cover.
- Have indicated on their Spray Diary for the season, before 31 March 2021, blocks that have hail netting or solid cover.

Zespri must confirm and agree the covered area production and will verify or audit this during the season.

POLICY RENEWAL

The Pool Hail Insurance Policy will be renewed on 1 August 2021. Any changes will be communicated accordingly.
